

The Institute of Biostatistics and Registry Research at the Brandenburg Medical School is looking for several

Statisticians, Data Scientists, Information Specialists or Statistical Programmers

for various tasks in data analysis and methods development. Appointments are initially for three years.

The **Brandenburg Medical School Theodor Fontane (MHB)** is a state-recognized non-profit university under municipal sponsorship. The Institute of Biostatistics and Registry Research in Neuruppin under the direction of Prof. Dr. Michael Hauptmann plays an important role in clinical and epidemiological research and also develops new statistical methods.

We are looking for candidates with applied statistical and/or mathematical training and the ambition to contribute to the improvement of health through performing state-of-the-art statistical analyses of medical data and to further develop those methods. The context of the work is in national and international clinical research (e.g., breast cancer), epidemiology (e.g., radiation research), health services research (e.g. health geography), and applied statistics (e.g., risk prediction). Tasks include data management and analysis, presentation of results, assisting in writing grant proposals and publications, and participation in meetings. Preferences in focus can be considered. In addition, there is the opportunity to participate in teaching, and for doctoral or post-doctoral research.

The position requires:

- Bachelor's or Master's degree in (bio)statistics, data science, data analytics, health sciences or related fields
- Experience with statistical data analysis
- Knowledge of applied mathematical statistics
- Advanced proficiency in English and German language, both written and spoken
- Reliability, initiative, creativity, independence, ability to work in a team

MHB promotes equality for all employees and considers the diversity of its workforce a great asset. In the spirit of diversity, we expressly welcome applications from people with a migration background. Severely disabled applicants will be given priority if their professional and personal qualifications are essentially the same.

The regular working week is 40 hours. Part-time work as well as partial home work is possible in principle. Remuneration is comparable to TV-L and based on training and experience. Applications from candidates who already hold a PhD are explicitly welcome. More information can be found at <https://www.mhb-fontane.de/institute-of-biostatistics-and-registry-research.html> or by contacting Prof. Dr. Michael Hauptmann at michael.hauptmann@mhb-fontane.de or +49 3391 39 14580.

Please send your application with the usual documents as one PDF file as well as information about your earliest possible starting date to bewerbung@mhb-fontane.de.

We are looking forward to your application!
